

SPEEDWATCH

Report to Parish Council Thursday 18th July 2019.

June was a quiet month for Speedwatch sessions, mainly due to operator holidays.

During June we ran 9 sessions consisting of approx. 8 hours, those sessions recorded 72 speeding vehicles from 1572 passing vehicles (4.4%), the fastest vehicle recorded was 45mph. The accuracy over the month was 99% this was because one vehicle failed the DVLA check (listed as silver, seen by us as white).

One of the reported vehicles was shown not to have tax and/or MOT.

July will be fairly light on sessions due to operators' other commitments, so far this month we have run 6 sessions with another 10 planned.

Cllr. Colin Boylett, Speedwatch Co-ordinator.
