

# **SPEEDWATCH**

## ***Report to Parish Council 21st November 2019***

**During September we carried out 14 sessions (10 hours), a further five sessions were cancelled for various reasons, mainly weather. The sessions recorded a total of 67 speeding vehicles from 2,207 passing vehicles (average 3%), the fastest vehicle recorded during the month was 46mph.**

**One half hour session did not record any speeding vehicles from 216 passing vehicles.**

**There are 19 sessions planned for November, however one has already had to be cancelled because of rain.**

**The number of sessions that can be run is limited to the number of volunteer operators, so we need to try and recruit a few more people. Winter is not a good time to encourage people to start standing at the roadside for half an hour or an hour, so we will have a recruitment campaign in the spring and hopefully get some more volunteers, but if anyone comes forward before then we will happily add them to the team, anyone interested just needs to contact me and I will help them get signed up.**

**Colin Boylett, Speedwatch Co-ordinator.**
